

## SUNSEEKER INTERNATIONAL

Mr Stephen Wilyman  
Chief Executive  
Mteq WLM Implementation Limited  
78 York Street  
London W1A 1DP

Date: 22 June 2011

Dear Stephen

For decades Sunseeker International Ltd have been designing and building their distinctive craft, they have evolved from being a brand into a true icon. To possess a Sunseeker has become an aspiration for many, to some an obsession. When only the best will do in luxury and performance, Sunseeker provides it.

Our Engine supply chain is an extremely important commercial and operational aspect of our business. On time Yacht engine planning and installation is a pivotal point within the build process. Mteq was commissioned to identify improvement opportunities primarily within our engine supply chain.

The project included comprehensive value stream mapping, analysis and critique applying a fully inclusive methodology incorporating all internal engine stakeholders and external suppliers.

We are very pleased to report that the project has identified significant areas for improvement across the Engine supply chain and we now look forward to jointly implementing your recommendations post summer shutdown.

Yours sincerely

Sunny Thakrar  
Group Financial Director
