3 February 2010

Dear Stephen,

VT Group is a leading support services group providing diverse services to government agencies both in the UK and USA.

To focus on providing often critical services to our customers the Group has undergone a reorganisation to become much more customer focused with a supporting shared services to provide back office support, compliance and governance.

Mteq were chosen to conduct a P4i to identify potential opportunities to significantly reduce our procurement spend across our UK business units. The Mteq P4i presentation identified a number of opportunities to achieve that objective.

At VT Group we are committed to delivering a quality tailored service to our customers and we look forward to Mteq working with our management team to deliver the projected financial benefits.

Yours sincerely

Chris Cundy
Corporate Development Director
